MACHINA

MISSION STATEMENT

At MACHINA, we believe progress in embodied AI is not defined by a single breakthrough, but by the dialogue between what exists, what's emerging, what's challenging and what's next. It is in this dialogue that intelligence evolves, boundaries shift and the future takes form.

Following an exceptional inaugural edition, MACHINA returns in 2027 as the leading global summit dedicated to connecting the leaders from across the physical AI and robotics ecosystem.

Built on RAISE's proven model of intimacy at scale, MACHINA brings together the founders, investors and industry adopters from the full physical AI stack: from the data and training companies that power it to the leading humanoid companies deploying at scale.

As the physical AI ecosystem consolidates, the goal is not simply to exhibit these technologies, but to bring together the leaders shaping each aspect of the industry. Set in Paris, with a global reach, MACHINA convenes those building the future of Physical AI to ensure that these technologies will be deployed across industries.

MACHINA

COMPANY FACTS

CONFERENCE NAME

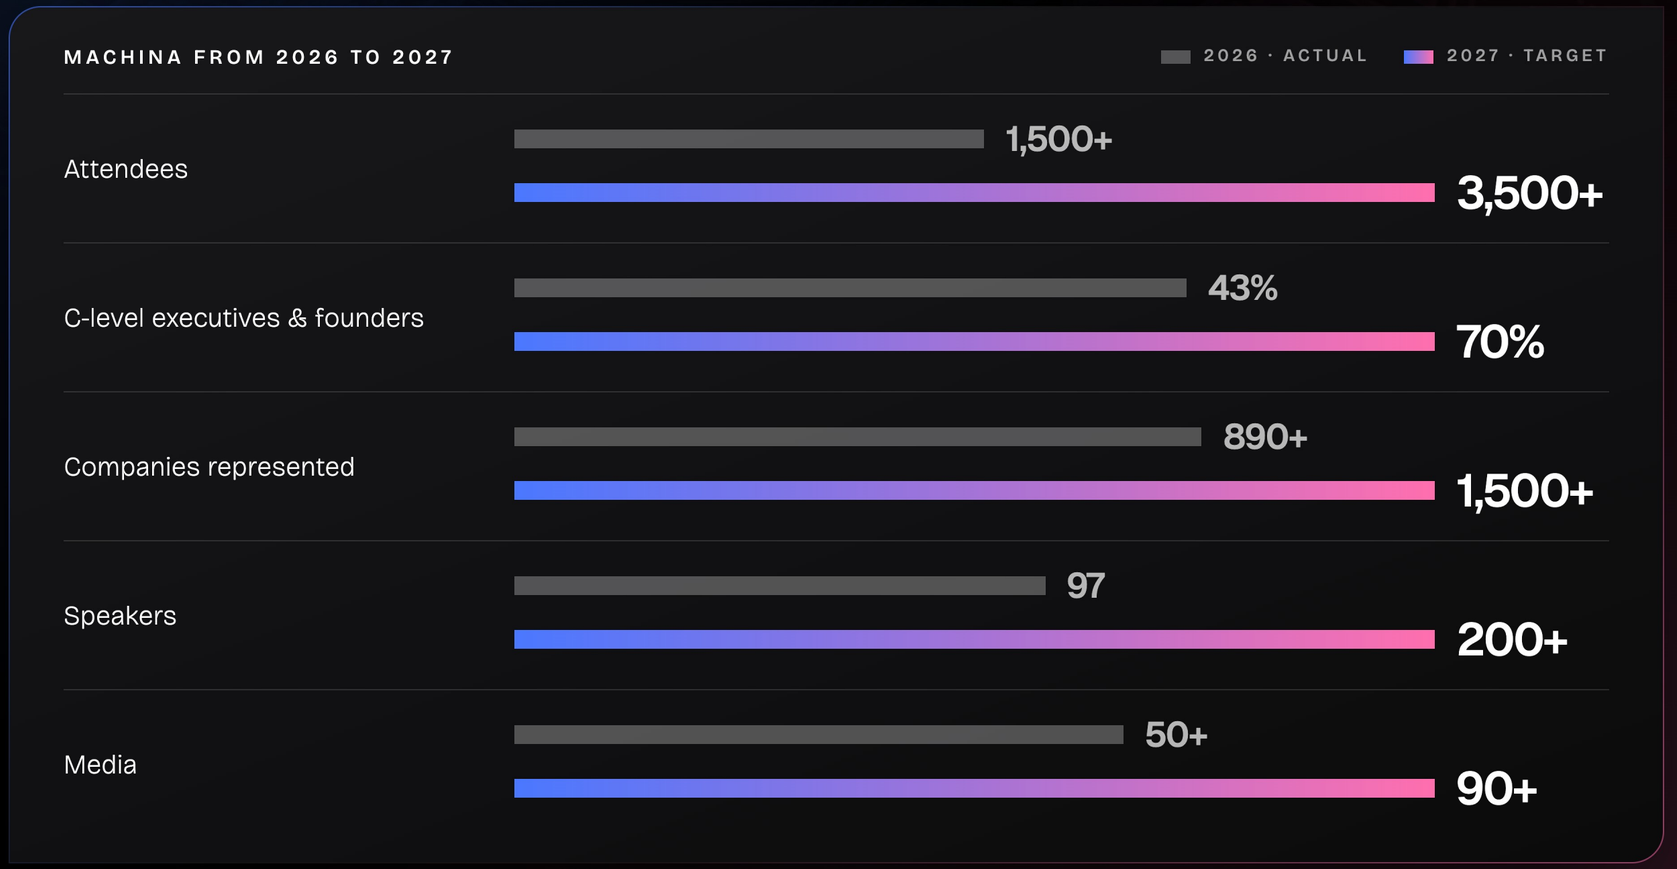

MACHINA SUMMIT

DATE

7–8 JULY 2027

LOCATION

PALAIS DES CONGRÈS & CHÂTEAU DE VERSAILLES, PARIS, FRANCE

2026 figures are first-edition results. 2027 figures are targets, not results.

THEMES

The Physical AI market is still in its early phase. But the next several years will determine who leads at each level of the stack. MACHINA is designed to meet you where you lead, whether you build, invest or reinvent, and to position you as a core player within the physical AI ecosystem.

THE 2027 AGENDA WILL BE STRUCTURED AROUND FOUR CORE DOMAINS:

01

EMBODIMENT

Humanoids, quadrupeds, autonomous vehicles, dexterous hands and specialised robots.

02

TRAINING

Simulation, synthetic data, foundation models and reinforcement learning.

03

DEPLOYMENT

Manufacturing, warehousing, factories, logistics, energy, infrastructure and space.

04

INFRASTRUCTURE

Semiconductors, compute, cloud infrastructure and hardware manufacturing.

MACHINA

2027 CONFIRMED SPEAKERS

MORE SPEAKERS ANNOUNCED SOON

The team curates a list of world-class speakers ranging from visionary founders and global investors to industry leaders and policy-shapers driving real-world impact.

MACHINA WEEK

MACHINA WEEK 2027 · PARIS · 4–8 JULY

FLAGSHIP · 7–8 JULY 2027

MACHINA SUMMIT

Palais des Congrès & Château de Versailles, Paris

MACHINASUMMIT.COM →

4 July 2027 · Location TBC

MACHINA FACTORY

INVITE ONLY · ONE DAY

A one-day Physical AI engineering event. The most serious builders ship real products against real infrastructure challenges, in front of the investors and enterprises that will fund and deploy them.

PROOF · RAISE HACKATHON 2026

1,900+ Participants

144 MVPs shipped

72% Core engineering, ML or research

<26 Average age

7 July 2027

MACHINA CXO SUMMIT

INVITATION ONLY · CLOSED DOOR

The private room inside Europe's leading Physical AI summit, where the builders of robots meet the industry leaders who decide how to deploy them. Curated 1:1 meetings, C-level only.

645 Meetings booked at MACHINA 2026

43% C-level attendees at MACHINA 2026

250+ Seats in 2027

8 July 2027 · L'Orangerie, Château de Versailles

MACHINA GALA DINNER

INVITATION ONLY · CLOSING NIGHT

Two days at the Palais des Congrès prove what Physical AI can do. On the closing night, the people deciding what gets deployed sit down together at L'Orangerie.

500 Guests, one evening

70% C-level execs and founders

~200 CxOs at MACHINA 2027

5-8 July 2027

FRONTIER MOMENT

Three layers. One city. One week. RAISE Week, MACHINA Week, and Signal Week & Fintech Meetup under one roof at the Palais des Congrès.

Signal Week	6-7 July
RAISE Summit	6-8 July
MACHINA Summit	7-8 July
Frontier Moment Closing Party	8 July

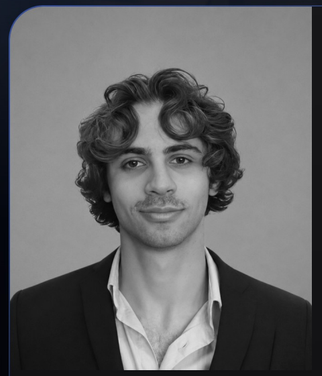

LEADERSHIP TEAM

HADRIEN **DE COURNON**

LINKEDIN ↗

A French entrepreneur and AI ecosystem builder, educated at École Polytechnique, HEC Paris, ESSEC Business School and UCL. His background shaped a strong interest in the impact of technology on society, business, and global competitiveness; regularly acknowledged for promoting the European AI ecosystem internationally.

DAVID **AMAR**

LINKEDIN ↗

Educated in Computer Science and Neuroscience at University College London, he is a French entrepreneur passionate about the future of work, and using technology for the betterment of our lives. With a previous background in prosthetics, David is now building the largest ecosystem for Physical AI in Europe.

HENRI **DELAHAYE**

LINKEDIN ↗

A French entrepreneur and AI ecosystem developer, educated at Trinity College Dublin, Tsinghua University, and ESCP Business School. He focuses on the strategic, economic, and societal implications of emerging technologies, with a strong interest in building platforms that connect leaders across the AI value chain.

Using the same strategic vision and development that shaped RAISE Summit, the co-founders created MACHINA Summit as a natural extension, focused on where AI meets the physical world, bringing together leaders in robotics, embodied intelligence, and industrial autonomy to drive real-world deployment of intelligent machines.

COMPANY HISTORY

Founded in 2025, MACHINA Summit was created as a premium international platform dedicated to Physical AI and its strategic impact on business, policy, and society.

Developed within the RAISE ecosystem, MACHINA reflects the next stage in the evolution of artificial intelligence, as systems move beyond software into real-world environments. It was built to address the growing need for a dedicated forum focused on robotics, embodied intelligence, and the deployment of AI in physical systems.

Its mission is to convene the leaders building this next generation of intelligent machines, and to accelerate the partnerships, capital, and infrastructure required to bring Physical AI into the real world.

MACHINA

WHAT THE INDUSTRY SAID

> The place is always defined by people, and here are the best people. You see all kinds of physical AI and robotics companies at the same time, all the investors relevant to physical AI. They're all here, and this makes this event so amazing.

NEURA

David Reger
Founder & CEO, NEURA Robotics
MACHINA 2026

> The thing that makes MACHINA unique is the concentration of founders and talent here... Some of my favourite founders are all here. That concentration for a conference like this, even in the early days, is really exciting.

APPTRONIK

Jeff Cardenas
Co-Founder & CEO, Apptronik
MACHINA 2026

> It's an interesting middle point between a trade show, which is a fairly established industry, and an academic conference, which is more research. This is more about how the industry is starting to become real, and more and more commercial.

Agility

Jonathan Hurst
Co-Founder, Agility Robotics
MACHINA 2026

NEURA

"MACHINA SUMMIT. IT'S THE PLACE TO BE."

DAVID REGER · NEURA ROBOTICS

PRESS COVERAGE

\sifted/

"At Paris's Machina conference, European robot makers jostle for attention... Two-legged robots, four-wheeled ones, and even some sporting Nike trainers gathered in Paris this week as the world's biggest robotics companies took stock of how far the industry has come — and how far it still has to go."

'Physical AI is Europe's last chance to be useful to the world' ↗

BY ÉANNA KELLY

CNET France

" La première édition du salon Machina de Paris montre que la France commence à se réveiller en matière de robotique. Un salon où l'on pouvait découvrir les yeux et les mains des robots. Et mesurer pleinement le chemin que l'Europe et la France ont à parcourir avant de pouvoir vraiment peser dans le secteur."

EN: "The first edition of the Machina trade show in Paris shows that France is starting to wake up when it comes to robotics. A show where you could discover the eyes and hands of robots. And fully gauge the road that Europe and France still have to travel before they can truly carry weight in the sector."

Machina, le salon qui fait de Paris l'éphémère capitale de la robotique ↗

BY ADRIAN BRANCO

South China Morning Post

"At the 2026 Machina Summit, European executives identify severe data training bottlenecks as a major obstacle... Machina – an inaugural one-day summit held in Paris on Tuesday that positions itself as the continent's leading event dedicated to the industry."

Physical AI 'space race': can Europe compete with China and the US in humanoid robotics? ↗
